EDUCATION

Bachelor of Science in Electrical and Computer Engineering - The University of Texas at Austin

TECHNICAL EXPERIENCE

Frontend Software Engineer, Olea Edge Analytics - *Remote*   9/20 - Present
- Implement features on the front end with React and TypeScript in a fast paced environment to address evolving needs and build out GraphQL queries to work with large sets of data
- Lead the development of our new mobile app designed in React Native to greatly increase the efficiency and accuracy of field reporting
- Supervise the work of two junior developers to help them learn and improve their skillsets often through pair programming while growing my own understanding of how others work

Frontend Software Engineer, Business Laboratory - *Remote*   2/19 - 5/19
- Build extensive web applications utilizing React among other libraries to   8/19 - 9/20
solve challenging problems brought forth by clients
- Led the development of several web applications and finished ahead of schedule with polished products that had custom D3 visualizations and intuitive user interfaces
- Spearheaded the transition to TypeScript in order to maximize the effectiveness of our in-house design system

Software Engineering Intern, Cvent - *Austin, TX*   6/19 - 8/19
- Programmed new client facing features on the front end utilizing JavaScript and React with particular attention on flexibility as other teams relied on the same code base
- Solved issues and built the infrastructure for new features on the Java back end that improved the communication abilities with end users
- Collaborated under an Agile workflow utilizing Jira to maximize the efficiency of my team of engineers and ensure that high quality code was pushed to production

Front End Development Intern, Chartly - *Remote*   1/18 - 12/18
- Constructed custom Vue components implemented in production software
- Developed data visualization software using JavaScript along with D3, HTML and CSS
- Compiled our components and visualizations into dashboards and kept track of it all using Bitbucket for our Git solution

Freelance Website Development - *Remote*   8/16 - 2/19
- Revamped multiple websites using HTML, CSS, and JavaScript
- Designed and built a custom themed WordPress site for a local business

SKILLS

Experienced with:
    JavaScript, React, TypeScript, GraphQL, React Native, NodeJS, HTML, CSS, D3, Git, Java

Interests and Projects

- Torus - Currently contributing to an open source game that runs in the browser
- Climbing Training Logbook and Tracker - Building a React app to keep track of my climbing training schedule and progress as well as outdoor climbs that I have done
- Rock Climbing - Have done several outdoor V11 boulders
